# SERVICES

## Laser Cutting Services

Custom Laser Cutting Han Machine specializes in custom laser cutting services. Whether you need intricate details, prototypes, or large-scale production work, we can handle any job with our state-of-the-art laser cutting machines. Our capabilities include:

**Precision Cutting:** Achieve complex and detailed cuts with unmatched accuracy.

**Fast Delivery:** We offer quick turnaround times to meet your project schedules.

**Various Materials:** We cut a wide range of materials, from metals to plastics.

## Metal Processing

Our metal processing services allow us to transform raw materials into finished products. We excel in the following areas:

**Sheet Metal Processing:** Precise cutting, bending, and shaping for various applications.

**Metal Prototyping:** Create prototypes for testing and product development.

**Welding and Assembly:** Expert welding and assembly services for your metal projects

## LASER CUTTING SERVICES

# STEPS

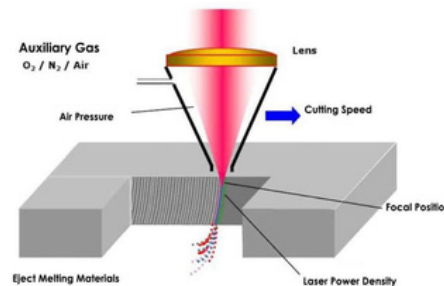

**Laser Generation:** The laser beam is generated using a laser tube or diode.

**Beam Focusing:** Lenses and mirrors focus the laser into a concentrated point.

**Material Placement:** The material to be cut or engraved is positioned on the working surface.

**Settings Configuration:** Laser power, speed, and frequency are adjusted based on the material and desired outcome.

## LASER CUTTING SERVICES

# STEPS

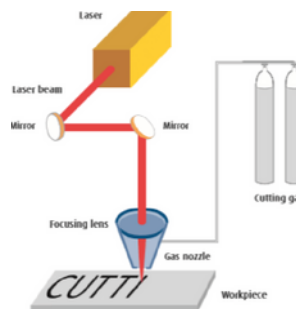

**Raster or Vector Setup:** Prepare the design as a engraving (raster) or cutting (vector)

**Image. Processing:** The laser either cuts along vector paths or quickly vaporizes material.

**Exhaust and Smoke Extraction:** Smoke is extracted to maintain a safe environment.

**Cooling:** Cooling systems prevent overheating of laser components.

**Completion and Removal:** The finished product is removed from the machine.
